Step 3: Install Digital Sign Client	5

This document is designed to give you a detailed instruction on how to install Digital Sign Client on a Windows device without using Microsoft Store.

The instruction is divided into 3 major steps, which will be described in the following sections.

#### Step 1: Turn off 'Developer Mode'

- 1. Open Windows Settings
- 2. Click on Update & Security
- 3. Select 'For developers'

命 Home	For developers	
Find a setting	These settings are intended for development use only. Learn more	
C Windows Update	Developer Mode Install apps from any source, including loose files.	
<ul> <li>Delivery Optimization</li> <li>Windows Security</li> </ul>	Off	
<ul> <li>Troubleshoot</li> </ul>	Turn on remote diagnostics over local area network connections.	
윤 Recovery	Device discovery	
<ul> <li>⊘ Activation</li> <li>▲ Find my device</li> </ul>	Make your device visible to USB connections and your local network. Off	
ዡ For developers	Note: This requires version 1803 of the Windows 10 SDK or later.	

4. Under 'Developer Mode', change the mode to 'Off'.

#### Step 2: Register Certificate

- 1. Right click 'AOD.DSSClients.UWP\_3.1.3.0\_x86.cer', select [Install Certificate]
- 2. Select 'Local Machine', then click [Next]
